The Basics

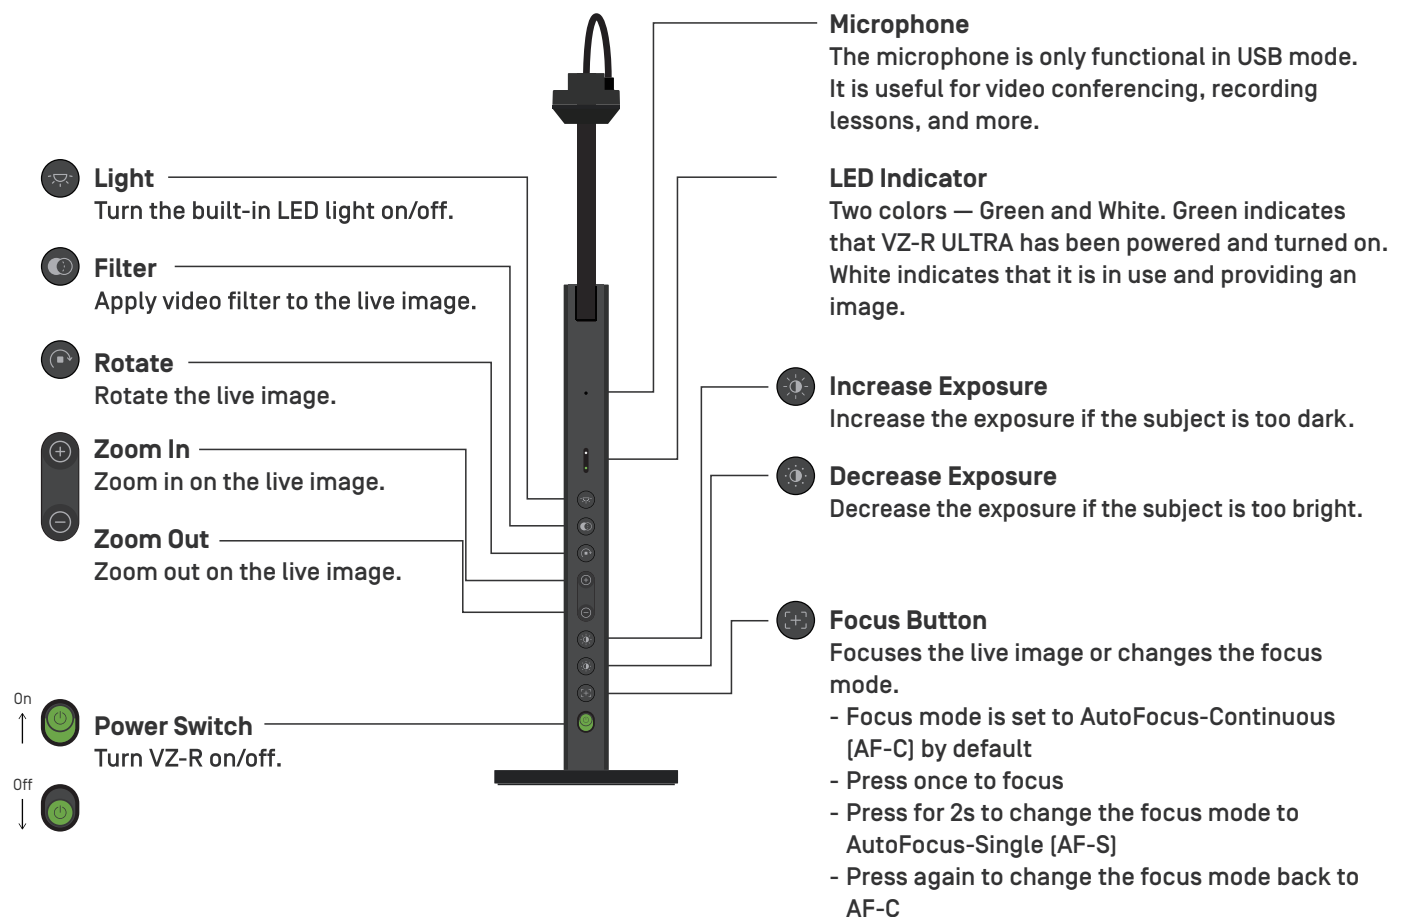

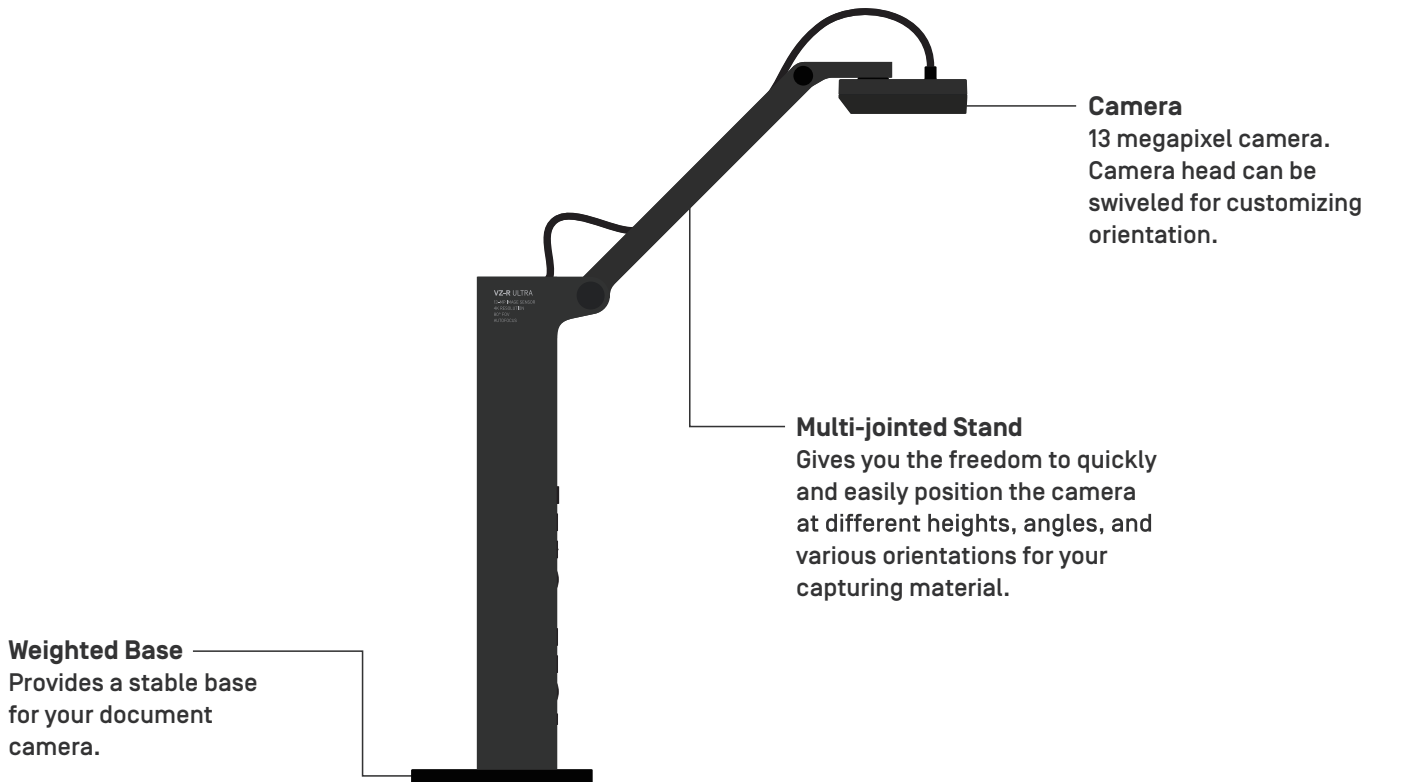

VZ-R ULTRA HDMI/USB Dual Mode 13MP Document Camera captures all your material — documents, textbooks, artwork, devices, and 3D objects — and streams real-time images directly to your TV, monitor, or projector via HDMI, skipping the need for a computer. It also features a USB connection for using with a computer.

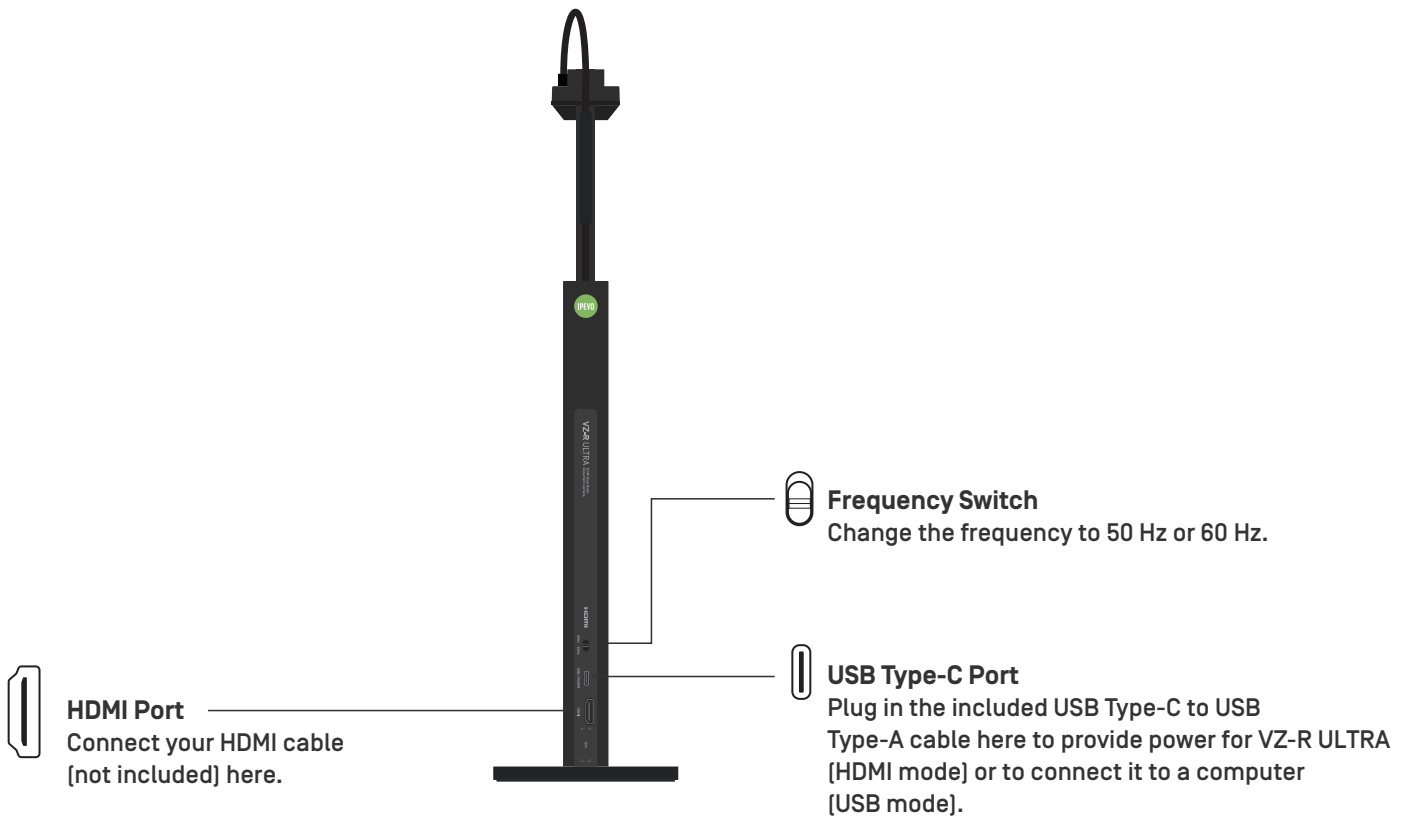

Attaching the Weighted Base

VZ-R ULTRA consists of two parts — an 13MP camera with a versatile multi-jointed stand, and a weighted base. Before you start using VZ-R ULTRA, please attach the weighted base to its stand using the included screwdriver and screws. And please be careful not to drop the base while doing so.

Getting to Know Your VZ-R ULTRA

Connecting to Your HDMI Displays

Please follow the steps below to connect your VZ-R ULTRA directly to a TV, projector or monitor via HDMI:

1. Connect an HDMI cable (not included) to the HDMI port of VZ-R ULTRA. Then, connect the other end of the cable to the HDMI port of a TV, projector or monitor.
2. Connect the included USB Type-C to USB Type-A cable to the USB port of VZ-R ULTRA. Then, connect the other end of the cable to the USB port of your TV, projector or computer to provide power for VZ-R ULTRA. Alternatively, you can also power VZ-R ULTRA by connecting the cable to a 5V/1A adapter (not included) and then to a power outlet.
3. Turn on VZ-R ULTRA using the Power Switch. A live image from VZ-R ULTRA should appear on your TV, projector or monitor. VZ-R ULTRA is now ready to use.

Using VZ-R ULTRA in USB Mode

You can use VZ-R ULTRA in the USB mode by connecting it to a computer via the included cable. You can then project live images to a large screen through a projector connected to your computer. VZ-R ULTRA is compatible with a variety of software when used in USB mode. To fully utilize your VZ-R ULTRA, we'd recommend you to use it with our IPEVO Visualizer software. You may download it at support.ipevo.com/vz-r-ultra.

Precaution

Do not use/store the product in the following places:

- Near heat sources
- Near steam or greasy smoke
- Locations with high humidity
- Sandy or dusty places
